

World War One and the Lickey Hills

3. The Local area – Work Pack for Pupils

Walk to viewpoint 1 on Bilberry Hill to look at the view over Birmingham (see maps on page two). This is a short walk from the Visitor Centre (**V** on the map) located on the path overlooking the city.

Look at the view of the city and identify where the Austin Motor Company once stood. It was located on the Lickey side of Bournville college, in the near distance. It is marked on the map printed on page two.

1. What do you think the Austin Motor Company made before 1917?
2. What do you think the company started to do to help the war continue in 1917 and 1918?
3. Why was the company required to do this?
4. Who asked for this to be done?
5. Who were the workers?
6. How did they make sure that what they made or repaired was safe and ready to be used on the battlefield?
7. Describe the type of place you think would be needed to test (proof) field guns and carriages.
8. Who would have the skills to test the guns and carriages?
